I think question/s should be asked of public sector agencies, such as... Do they have an m.o.u. with an experienced non-profit professional organization proficient and cost effective in the maintenance and restoration of recreational opportunities areas and facilities. How much of their grant would be paid to the non-profit to accomplish the grant objectives. Would the agency be hiring new people to accomplish grant tasks or would existing payroll be supplanted by the grant disbursements. Additionally all applicants should be asked to describe, in substantial detail, their before & after verification documentation of grant tasks performed. The answers to these questions should significantly impact the number of points earned or lost.
